

PaySphere Support Guide: Account Security and Password Resets

1. Password Security Standards

PaySphere enforces strict industry-standard security measures on user accounts to prevent unauthorized access. Your new password must satisfy the following minimum requirements:

- At least 12 characters in length.
- Include at least one uppercase letter (A-Z) and one lowercase letter (a-z).
- Include at least one digit (0-9) and one special character (e.g., !, @, #, \$, %, &).
- Must not match any of your 5 previously used passwords.

2. Standard Password Reset Workflow

To reset your password, please follow these step-by-step instructions:

1. Navigate to the PaySphere Login portal and click on the 'Forgot Password' link below the input fields.
2. Input your registered administrative email address. Click 'Send Reset Instructions'.
3. Check your inbox for an automated email with the subject line 'PaySphere Password Reset Code'. The link inside this email is valid for exactly 15 minutes for security reasons.
4. Click the link and enter a new password meeting the security criteria specified in Section 1.
5. Confirm the password reset by entering your Multi-Factor Authentication (MFA) code.

3. Multi-Factor Authentication (MFA) Recovery

If you lose access to your primary MFA device (authenticator app or security key): You must locate the 16-character backup recovery codes generated during your initial account configuration. Enter one of these recovery codes in the MFA input screen to log in and update your security details.

If you do not have your backup recovery codes, a account verification review is required. Please contact security-verification@paysphere.com with your business identification data to verify ownership.

4. Account Lockouts and Suspicious Attempts

PaySphere locks accounts temporarily after 5 consecutive failed login attempts or password reset attempts. A lockout lasts for exactly 30 minutes. Once the lockout duration expires, the account is automatically unlocked. For urgent overrides, your organization's primary account owner can manually unlock your profile via the dashboard's Teammates management panel.
